

Hit 'em Quick

Game Design Document (Prototype Version)

Overview

Genre

Stealth Heist / Extraction

Perspective

Top-Down 2D (Current Prototype)

Potential future expansion:

- First-Person 3D

Target Platform

- PC
- Browser (Web Build)

Core Fantasy

The player is a small-time criminal working for a dangerous crime boss. Owing a massive debt, they must complete increasingly difficult heists to earn enough money to buy their freedom.

The player sneaks through buildings, steals valuables, avoids detection, and escapes with their loot before police arrive.

Core Gameplay Loop

1. Select a heist.
2. Enter the target location.
3. Search rooms for valuables.
4. Avoid guards and suspicion.
5. Carry loot back to extraction.
6. Escape successfully.
7. Receive earnings.

8. Purchase upgrades.
9. Attempt larger heists.

Repeat until debt is paid.

Win Condition

Successfully repay the debt owed to the crime boss.

Example:

Starting Debt: \$10,000,000

The player gradually earns money through successful heists.

Failure Conditions

The player is caught by Police.

Guards cannot arrest the player.

Being caught:

- Ends the current heist.
 - Unsecured loot is lost.
 - Stored loot remains safe.
 - Player returns to menu.
-

Level Structure

Available Levels

Small House

- Few rooms
- Few guards
- Low-value loot

Store

- Medium difficulty

- Security presence
- Moderate-value loot

Office

- Larger building
- More valuables
- Increased guard presence

Fancy House

- High-value loot
- Better security

Warehouse

- Large layout
- Long sight lines
- High-risk items

Future levels:

- Museum
- Bank
- Mansion Estate
- Corporate Headquarters

Extraction System

Player spawns at an extraction point.

Extraction point:

- Marked by a green tile.
- Acts as both spawn and escape location.

To complete a heist:

- Return to extraction point.
 - Escape with carried loot.
-

Loot System

Each loot item contains:

- Name
- Category
- Value
- Weight

Example:

Gold Watch

- Value: \$1,200
- Weight: 2

Diamond Necklace

- Value: \$4,500
- Weight: 1

Laptop

- Value: \$2,000
 - Weight: 5
-

Loot Categories

Jewelry

Spawn Locations:

- Jewelry Cases
- Safes
- Dressers

Items:

- Rings
 - Necklaces
 - Bracelets
-

Electronics

Spawn Locations:

- Desks
- Tables
- Offices

Items:

- Laptops
 - Watches
 - Phones
-

Kitchen

Spawn Locations:

- Cabinets
- Counters
- Tables

Items:

- Appliances
 - Silverware
 - Decorative items
-

Luxury

Spawn Locations:

- Display Areas
- Safes

Items:

- Antiques
 - Artwork
 - Collectibles
-

Loot Generation

Every spawn point:

1. Rolls a spawn chance.
2. 75% chance to spawn loot.
3. Selects an item from the room loot table.

This creates variation between runs.

Inventory System

Player inventory tracks:

- Item Name
- Value
- Weight

Displays:

- Total Value
- Total Weight

Player may:

- Pick up items
 - Drop items
 - View inventory
-

Weight System

Carried loot affects movement speed.

Weight Tiers:

0-10

- 100% speed

10-25

- 90% speed

25-40

- 75% speed

40+

- 60% speed

Heavy items are generally worth more money.

Security System

Guards

Purpose: Private security.

Behavior:

- Follow waypoint patrols.
- Move only between assigned patrol nodes.
- Never leave patrol routes.
- Investigate suspicious activity.

Guards cannot arrest the player.

Guard Vision

Flashlight/View Cone:

- 6 grid units

Detection:

0-3 tiles:

- Immediate detection.
- Police dispatched.

4-5 tiles:

- Suspicious.
- Continue patrol.

6+ tiles:

- Cannot see player.
-

Suspicion Squares

When a Guard spots the player:

- Player location is saved.
- A Suspicion Square is created.

This becomes the first police search location.

Police System

Purpose: Response force.

Police are the only units capable of arresting the player.

Police Response

When dispatched:

1. Spawn at police spawn point.
2. Travel to Suspicion Square.
3. Begin searching nearby area.

Search Logic:

Every 10 seconds:

- Choose random tile within 7 tiles.
- Path to that tile.

If invalid:

- Retry after half cooldown.
-

Police Despawn

Police despawn after:

120 seconds

without any new sightings by:

- Guards
 - Police
-

AI Memory

Guard Memory

Stores:

- Last sighting
 - Suspicion state
 - Active alert
-

Police Memory

Stores:

- Suspicion Square
- Search targets
- Last confirmed player position

Police and Guards share information but maintain separate state systems.

Alert States

Normal

- Patrols operate normally.

Suspicious

- Increased awareness.

Alerted

- Police dispatched.

Lockdown

- Future expansion.
-

Player Tools

Purchased through Shop.

Lockpick

Purpose: Access locked areas.

Future: Durability system.

Noisemaker

Purpose: Create distractions.

Causes guards to investigate.

Bag Upgrade

Purpose: Increase carrying capacity.

Allows heavier loot hauls.

Shop

Available from Main Menu.

Current Items:

- Lockpick
- Noisemaker
- Bag Upgrade

Future:

- Better Flashlights
 - Silent Shoes
 - Alarm Jammers
 - Fake Replacements
-

Main Menu

Layout:

Left Side:

- Title
- Play
- Shop
- Quit

Right Side:

- Character Sprite

Title:

Hit 'em Quick

Subtitle:

get out fast.

Level Select

Current Options:

- Small
- Medium
- Large

Future:

- Individual named locations
-

Long-Term Progression

Player earns money from successful heists.

Money is used for:

- Equipment
- Upgrades
- Future Safehouse Features

Ultimate Goal: Pay off debt and gain freedom.

Future Features

Safehouse

Customizable player home.

Possible upgrades:

- Storage
 - Workshop
 - Intel Room
 - Trophy Room
-

Procedural Levels

Grid-based room generation.

Rooms:

- House
- Office
- Hallway
- Storage
- Security

Connected through aligned doorways.

First-Person Version

Potential future remake:

- Full 3D stealth gameplay
- Flashlight mechanics
- Enhanced AI
- Immersive burglary simulation
